# SARAH RUTH FINKEL

## Software Engineer

505-485-9799 • srfinkel@gmail.com • linkedin.com/in/srfinkel • Albuquerque, NM (remote)

## SUMMARY

Backend engineer specializing in Ruby-based platform work, infrastructure automation, and Kubernetes deployments. I build and maintain the tooling that helps internal teams provision services, ship applications, and work more consistently across environments. My recent work includes AWS EKS platform support, OpenShift-to-EKS migration efforts, developer environment standardization, and secure delivery workflows using GitHub Actions, Terraform, and AWS.

## EXPERIENCE

**Ruby Software Engineer III**

**Randstad Digital**

11/2022 - 10/2026 • Minneapolis, Minnesota (remote)

Individual Contributor to Best Buy's internal platform supporting thousands of internal applications via provisioning and deployments

- Developed the core AWS EKS action gem responsible for orchestrating container deployments of over 2,300 AWS EKS applications
- Completed DNS cutovers and component validation that advanced the OpenShift-to-EKS migration.
- Standardized local Kubernetes development with Helm charts, Dockerfiles, and automated setup scripts for Rancher Desktop-based testing.
- Updated gem sources across 15+ microservices and SDK repositories during a multi-repository migration.
- Automated Vault-based Artifactory token retrieval to secure gem publishing workflows.
- Completed credential rotations for critical production service accounts.
- Produced documentation for platform processes and workflows.

**Application Programmer II**

**ECS Tech**

05/2022 - 10/2022 • Albuquerque, NM

Full stack engineer building Ruby on Rails, Java/Angular applications for Sandia National Laboratories

- Obtained security clearance.
- Maintained integrated Docker and Ubuntu VM environments supporting development and deployment for dozens of internal applications.
- Contributed documentation, code reviews, and weekly planning for internal application work.

**Web Analyst II**

**University of New Mexico Hospitals**

11/2018 - 05/2022 • Albuquerque, NM

Full Stack engineer for dozens of custom internal Ruby Gem and Ruby on Rails applications

- Built a custom WordPress intranet and maintained production Ubuntu VMs.
- Resolved technical issues in legacy ColdFusion applications.
- Maintained codebases using Git and Agile workflows.
- Delivered in-house applications used across the hospital as lead developer.

**Web Developer I**

**HealthInsight (now Comagine Health)**

06/2017 - 11/2018 • Albuquerque, NM

Developed and maintained internal and external websites with Joomla, Moodle, WordPress, and Drupal

- Integrated external APIs between platforms.
- Delivered web work that met HIPAA and Section 508 compliance requirements.
- Supported Linux cloud environments through system administration tasks.

**LAMP Stack Developer**

**Surefi**

5/2017-6/2017 • Albuquerque, NM

- Assisted in the development of their flagship wifi marketing application using PHP, MySQL, JavaScript, jQuery, and Bootstrap.
- Installed necessary equipment at commercial customer locations.
- Integrated various APIs, including, SendGrid and Google Charts.

## KEY ACHIEVEMENTS

**Deployment Orchestration**

Successfully orchestrated deployments for over 2,300 AWS EKS applications.

**Repository Migration**

Coordinated migration of over 15 microservices and SDKs.

**Local Development Setup**

Standardized local development setup for 20+ developers.

**Credential Management**

Executed credential rotations impacting 50+ critical accounts.

## EDUCATION

**Bachelor of Fine Arts, Cum Laude**

**Syracuse University**

Syracuse, NY

**Deep Dive Coding Bootcamp, 400+ hours of FS LAMP immersion**

**CNM Ingenuity, Inc**

Albuquerque, NM

## SKILLS

Ruby, Ruby on Rails, Bash, Python, Java, JavaScript, Angular, Git, GitHub Actions, Terraform, AWS, OpenShift, HTML, CSS, SASS, APIs, Docker, Podman, Agile, Rspec, RuboCop, Rake, Jenkins, Kubernetes, ArgoCD, Rancher Desktop, Splunk, Jira
